Baseline Assessment of Universal Health Coverage (UHC) for Maternal and Child Health Services

Collaboration with UNICEF

Research Sharing Event 2014-2015

Jakarta, 31 Maret 2015

Context

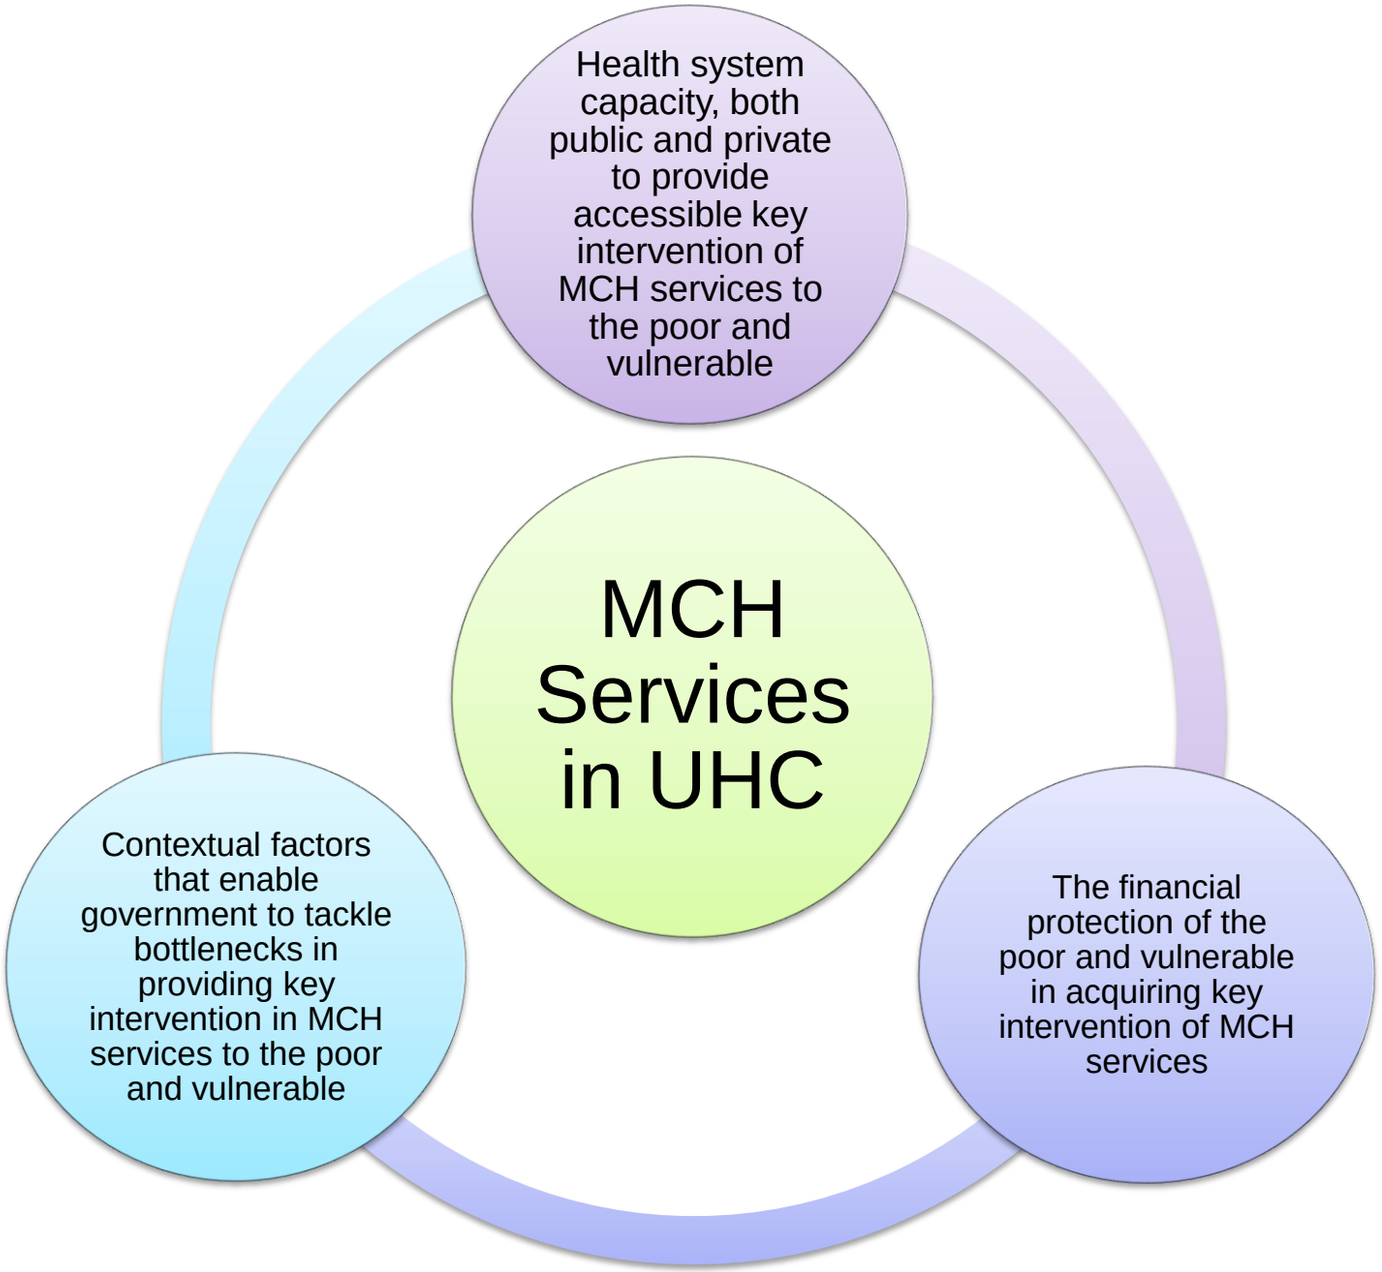
- Universal Health Coverage (UHC) started in 1 January 2014 with target to cover all population gradually by 2019. UHC includes maternal and child care services

- However, main challenge in the maternal and child health services overshadowing the UHC implementation is achieving the MDGs 4 & 5 in reducing maternal and infant mortality

Study Objectves

- To conduct a baseline assessment on the early implementation of the UHC mainly focusing on MCH services
- To understand how effectively UHC policy and its service delivery systems can be adapted to the special challenges of reaching worst-off children and women
- To provide inputs on policy and guidelines at the national level

Kerangka Konseptual



Study Design and Sample

- Qualitative : in-depth interview and focus group discussion
- Quantitative : data from existing documents and documentations

7 districts

- 2 districts (Bogor city and Sleman district) were purposely selected as representative of urban and rural setting in Java Island.
- 5 districts were selected based on sampling of three groups indicator e.g. supply sides, MCH services, and health *outcome* indicators, and representative of remaining big islands (Sumatra, Kalimantan, Bali-Nusa Tenggara, Sulawesi, Maluku-Papua)

Bogor city	Sleman district	Padang Panjang city	Hulu Sungai Utara district	Lombok Timur district	Gorontalo Utara district	Halmahera Barat district

Study Progress (continued)

November – December 2014	**Field visit (Nov 2014) :** Interview at the national level and field visit in Bogor dan Sleman **Analytical tools revision**
February – March 2015	**Field visit (Feb - Mar 2015) :** Field visit In 5 disticts
April 2015	Data and information analysis
Mei 2015	Draft report
