

Poverty and Inequality

Research Sharing Event 2014—2015

Jakarta, 31 Maret 2015

Introductory Notes (1)

- Combating poverty and inequality are
 - noble task of humanity;
 - economically rational;
 - human from a social perspective.
- Is poverty level disparity between the regions change?
- What is the condition of poverty by age group?
- Benefits of poverty maps in shaping the goals and formulating poverty reduction policies.

Introductory Notes (2)

- Inequality measured by the Gini Coefficient increased.
- What was the impact of inequality on social welfare and conflict?
- Is the physical infrastructure improvements always have a positive impact?

If the problems are not taken care of by good research results; quality economic growth and competitiveness will be difficult to achieve.
